

COLLEGE of HEALTH and HUMAN PERFORMANCE

HEALTH EDUCATION AND PROMOTION

Environmental Health

- Pharmaceutical Environmental Health Specialist: Overseeing environmental health and safety programs within pharmaceutical companies.
- Environmental Compliance Manager (Pharma): Ensuring compliance with environmental regulations and laws related to pharmaceutical operations.
- Pharmaceutical Environmental Risk Analyst: Identifying and assessing environmental risks associated with pharmaceutical products and processes.
- Sustainability Coordinator (Pharma): Developing and implementing sustainability initiatives to reduce the environmental impact of pharmaceutical operations.
- Pharmaceutical Waste Management Specialist: Managing waste disposal and recycling programs for pharmaceutical companies.
- Environmental Monitoring Technician (Pharma): Monitoring and analyzing environmental conditions within pharmaceutical facilities.
- Pharmaceutical Occupational Health and Safety Specialist: Ensuring a safe and healthy working environment for employees in pharmaceutical companies.
- Environmental Impact Assessment Manager (Pharma): Conducting environmental impact assessments for pharmaceutical projects and initiatives.
- Pharmaceutical Water Resources Manager: Managing water usage and conservation efforts within pharmaceutical operations.
- Environmental Policy Analyst (Pharma): Analyzing environmental policies and regulations that affect the pharmaceutical industry.
- Pharmaceutical Air Quality Specialist: Monitoring and managing air quality within pharmaceutical facilities.
- Environmental Health Inspector (Pharma): Conducting inspections to assess compliance with environmental health and safety standards.
- Pharmaceutical Green Initiatives Coordinator: Promoting and implementing green initiatives to reduce the environmental footprint of pharmaceutical operations.
- Environmental Sustainability Consultant (Pharma): Providing expertise and recommendations on environmental sustainability strategies for pharmaceutical companies.
- Pharmaceutical Environmental Health Officer: Overseeing environmental health and safety programs for pharmaceutical research and production facilities.

Public Health

- Pharmaceutical Public Health Specialist: Collaborating with public health agencies and healthcare organizations to address public health challenges and promote health initiatives.
- Epidemiologist (Pharma): Conducting research and analyzing data related to the spread and impact of diseases and health conditions.
- Medical Affairs Specialist (Pharma): Providing medical and scientific expertise on public health matters related to pharmaceutical products.
- Health Outcomes Researcher (Pharma): Conducting research to assess the real-world effectiveness and impact of pharmaceutical products on public health.
- Pharmaceutical Health Education Coordinator: Developing and implementing health education programs and materials to raise awareness about health conditions and treatment options.
- Health Policy Analyst (Pharma): Analyzing healthcare policies and regulations that affect pharmaceutical products and public health outcomes.

- Pharmaceutical Vaccines Program Manager: Overseeing vaccination programs and initiatives to improve public health outcomes.
- Global Health Specialist (Pharma): Developing strategies and partnerships to address global health issues through pharmaceutical interventions.
- Pharmaceutical Public Health Liaison: Building relationships with public health organizations and stakeholders to support collaborative efforts.
- Population Health Analyst (Pharma): Analyzing population health data to identify trends and opportunities for pharmaceutical interventions.
- Pharmaceutical Disease Surveillance Specialist: Monitoring and analyzing disease data to identify outbreaks and public health threats.
- Health Equity Coordinator (Pharma): Developing and implementing strategies to address health disparities and promote health equity through pharmaceutical initiatives.
- Pharmaceutical Health Promotion Manager: Planning and executing health promotion campaigns to improve public health outcomes.
- Pharmaceutical Community Health Coordinator: Working with communities to identify health needs and develop tailored pharmaceutical solutions.
- Occupational Health and Safety Specialist (Pharma): Ensuring a safe and healthy work environment for pharmaceutical employees and public health professionals.

INTERIOR DESIGN AND MERCHANDISING

Interior Design

- Pharmaceutical Facility Interior Designer: Designing and planning the interior spaces of pharmaceutical research and manufacturing facilities to ensure functionality, safety, and compliance with regulations.
- Pharmaceutical Office Interior Designer: Creating innovative and functional office spaces for pharmaceutical company headquarters and administrative offices.
- Laboratory Interior Designer (Pharma): Designing and optimizing interior layouts for pharmaceutical research and development laboratories.
- Cleanroom Design Specialist (Pharma): Designing and planning cleanroom environments for pharmaceutical manufacturing facilities to meet strict hygiene and contamination control requirements.
- Pharmaceutical Showroom Designer: Designing showrooms and exhibition spaces to showcase pharmaceutical products and innovations.
- Pharmaceutical Retail Space Designer: Designing and optimizing retail spaces for pharmaceutical products and healthcare-related items.
- Pharmaceutical Exhibition and Conference Designer: Creating engaging and attractive booth designs for pharmaceutical companies at industry exhibitions and conferences.
- Pharmaceutical Product Display Designer: Designing attractive displays for pharmaceutical products in pharmacies and healthcare facilities.
- Pharmaceutical Design Compliance Specialist: Ensuring that the interior designs of pharmaceutical facilities adhere to relevant regulations and guidelines.
- Environmental Graphics Designer (Pharma): Creating visual displays, signage, and wayfinding elements within pharmaceutical facilities.
- Pharmaceutical Space Planning Specialist: Planning and optimizing interior layouts for efficient space utilization in pharmaceutical buildings.
- Healthcare Interior Design Consultant (Pharma): Providing expert advice on interior design solutions for pharmaceutical facilities and healthcare environments.
- Ergonomics Specialist (Pharma): Considering ergonomic principles in the design of workspaces and manufacturing areas within pharmaceutical companies.

- **Pharmaceutical Branding and Identity Designer:** Incorporating pharmaceutical brand elements into the interior design of company spaces.
- **Sustainable Design Consultant (Pharma):** Integrating sustainable design practices into pharmaceutical facility interiors.

Fashion Merchandising and Consumer Studies

- **Pharmaceutical Market Research Analyst:** Conducting market research and consumer studies to understand patient preferences, behaviors, and attitudes towards pharmaceutical products.
- **Pharmaceutical Product Development Specialist:** Collaborating with cross-functional teams to develop pharmaceutical products that meet consumer needs and preferences.
- **Pharmaceutical Consumer Insights Manager:** Analyzing consumer data and trends to provide insights on pharmaceutical product development and marketing strategies.
- **Healthcare Consumer Experience Coordinator (Pharma):** Focusing on improving the overall consumer experience with pharmaceutical products and healthcare services.
- **Pharmaceutical Branding and Packaging Designer:** Creating visually appealing and consumer-friendly packaging designs for pharmaceutical products.
- **Pharmaceutical Product Marketing Specialist:** Developing marketing strategies and campaigns that resonate with consumers in the healthcare and pharmaceutical space.
- **Pharmaceutical Digital Consumer Engagement Manager:** Managing digital platforms and campaigns to engage with consumers and patients in the pharmaceutical industry.
- **Pharmaceutical Customer Relations Specialist:** Building and maintaining positive relationships with consumers and patients who use pharmaceutical products.
- **Healthcare Product Merchandising Analyst (Pharma):** Applying fashion merchandising principles to display and promote pharmaceutical products in healthcare settings.
- **Pharmaceutical Patient Education Coordinator:** Designing educational materials and resources that are consumer-centric and easy to understand.
- **Pharmaceutical Market Trend Analyst:** Analyzing market trends and consumer behavior in the pharmaceutical industry to inform business strategies.
- **Healthcare Consumer Advocacy Specialist (Pharma):** Advocating for consumer needs and interests within pharmaceutical companies and healthcare organizations.
- **Pharmaceutical Retail Experience Manager:** Enhancing the consumer experience in pharmacies and retail outlets that sell pharmaceutical products.
- **Healthcare Consumer Behavior Consultant (Pharma):** Providing expert advice on consumer behavior and its impact on pharmaceutical product development and marketing.
- **Pharmaceutical Consumer Satisfaction Analyst:** Assessing consumer satisfaction and feedback to improve pharmaceutical products and services.

KINESIOLOGY

Exercise Physiology

- **Pharmaceutical Clinical Research Associate (Exercise Physiology):** Participating in clinical trials and studies related to pharmaceutical products that may have an impact on exercise physiology.
- **Exercise Physiology Research Scientist (Pharma):** Conducting research on the effects of pharmaceutical interventions on exercise performance and physiology.
- **Pharmaceutical Medical Science Liaison (Exercise Physiology):** Providing scientific expertise on the impact of pharmaceutical products on exercise physiology to healthcare professionals.
- **Health Outcomes Researcher (Exercise Physiology) (Pharma):** Conducting research to assess the real-world effectiveness of pharmaceutical products in patients with specific exercise physiology considerations.

- **Pharmaceutical Exercise Physiology Consultant:** Providing expert advice on exercise physiology-related matters in the context of pharmaceutical products and treatments.
- **Clinical Exercise Physiologist (Pharma):** Designing and implementing exercise interventions as part of pharmaceutical clinical trials.
- **Pharmaceutical Fitness and Wellness Coordinator:** Developing fitness and wellness programs that align with pharmaceutical treatments and products.
- **Exercise Physiology Data Analyst (Pharma):** Analyzing data from clinical trials and research studies that involve pharmaceutical interventions and exercise physiology outcomes.
- **Pharmaceutical Sports Science Specialist:** Applying exercise physiology principles to the development and evaluation of pharmaceutical products for athletes and active individuals.
- **Exercise Physiology Program Manager (Pharma):** Managing exercise physiology programs that complement pharmaceutical treatments and therapies.
- **Pharmaceutical Exercise Physiology Educator:** Educating healthcare professionals and patients on exercise physiology considerations related to pharmaceutical treatments.
- **Exercise Physiology Compliance Specialist (Pharma):** Ensuring compliance with exercise physiology standards in pharmaceutical research and development.
- **Pharmaceutical Lifestyle Medicine Coordinator:** Integrating exercise physiology and lifestyle interventions into pharmaceutical treatment plans.
- **Exercise Physiology Clinical Specialist (Pharma):** Providing specialized expertise on exercise physiology matters in clinical settings that involve pharmaceutical products.
- **Pharmaceutical Performance Enhancement Specialist:** Collaborating with pharmaceutical researchers to assess the impact of products on exercise performance.

Health Fitness Specialist

- **Pharmaceutical Clinical Research Associate (Health Fitness):** Participating in clinical trials and studies related to pharmaceutical products that may impact health and fitness outcomes.
- **Health Fitness Research Scientist (Pharma):** Conducting research on the effects of pharmaceutical interventions on health and fitness parameters.
- **Pharmaceutical Medical Science Liaison (Health Fitness):** Providing scientific expertise on how pharmaceutical products may influence health and fitness to healthcare professionals.
- **Health Outcomes Researcher (Health Fitness) (Pharma):** Conducting research to assess the real-world effectiveness of pharmaceutical products on health and fitness outcomes.
- **Pharmaceutical Health Fitness Consultant:** Offering expert advice on health fitness considerations in the context of pharmaceutical treatments and products.
- **Fitness and Wellness Program Manager (Pharma):** Developing fitness and wellness programs that complement pharmaceutical treatments.
- **Pharmaceutical Exercise and Nutrition Specialist:** Applying health fitness principles to pharmaceutical product development and evaluation.
- **Health Fitness Data Analyst (Pharma):** Analyzing data from clinical trials and research studies involving pharmaceutical interventions and health fitness outcomes.
- **Pharmaceutical Lifestyle Medicine Coordinator:** Integrating health fitness and lifestyle interventions into pharmaceutical treatment plans.
- **Health Fitness Compliance Specialist (Pharma):** Ensuring compliance with health fitness standards in pharmaceutical research and development.
- **Pharmaceutical Health and Wellness Educator:** Educating healthcare professionals and patients on health fitness considerations related to pharmaceutical treatments.
- **Health Fitness Program Coordinator (Pharma):** Managing health fitness programs in conjunction with pharmaceutical therapies.

- **Pharmaceutical Lifestyle Coach:** Providing coaching and support to patients on integrating health fitness practices alongside pharmaceutical treatments.
- **Health Fitness Clinical Specialist (Pharma):** Offering specialized expertise on health fitness matters in clinical settings that involve pharmaceutical products.
- **Pharmaceutical Performance Enhancement Specialist:** Collaborating with pharmaceutical researchers to assess the impact of products on health and fitness performance.

Physical Education

- **Pharmaceutical Clinical Research Associate (Physical Education):** Participating in clinical trials and studies related to pharmaceutical products that may impact physical activity and health outcomes.
- **Physical Education Research Scientist (Pharma):** Conducting research on the effects of pharmaceutical interventions on physical activity and exercise parameters.
- **Pharmaceutical Medical Science Liaison (Physical Education):** Providing scientific expertise on how pharmaceutical products may influence physical activity and fitness to healthcare professionals.
- **Health Outcomes Researcher (Physical Education) (Pharma):** Conducting research to assess the real-world effectiveness of pharmaceutical products on physical activity and health outcomes.
- **Pharmaceutical Physical Education Consultant:** Offering expert advice on physical education considerations in the context of pharmaceutical treatments and products.
- **Fitness and Exercise Program Manager (Pharma):** Developing fitness and exercise programs that complement pharmaceutical treatments.
- **Pharmaceutical Exercise Specialist:** Applying physical education principles to pharmaceutical product development and evaluation.
- **Physical Activity Data Analyst (Pharma):** Analyzing data from clinical trials and research studies involving pharmaceutical interventions and physical activity outcomes.
- **Pharmaceutical Lifestyle Medicine Coordinator:** Integrating physical education and lifestyle interventions into pharmaceutical treatment plans.
- **Physical Education Compliance Specialist (Pharma):** Ensuring compliance with physical education standards in pharmaceutical research and development.
- **Pharmaceutical Health and Wellness Educator:** Educating healthcare professionals and patients on physical education considerations related to pharmaceutical treatments.
- **Fitness Program Coordinator (Pharma):** Managing fitness programs in conjunction with pharmaceutical therapies.
- **Pharmaceutical Lifestyle Coach:** Providing coaching and support to patients on integrating physical education practices alongside pharmaceutical treatments.
- **Physical Education Clinical Specialist (Pharma):** Offering specialized expertise on physical education matters in clinical settings that involve pharmaceutical products.
- **Pharmaceutical Performance Enhancement Specialist:** Collaborating with pharmaceutical researchers to assess the impact of products on physical activity and fitness performance.

Sports Studies

- **Pharmaceutical Clinical Research Associate (Sports Studies):** Participating in clinical trials and studies related to pharmaceutical products that may impact sports performance and athlete health.
- **Sports Studies Research Scientist (Pharma):** Conducting research on the effects of pharmaceutical interventions on sports performance and athlete physiology.
- **Pharmaceutical Medical Science Liaison (Sports Studies):** Providing scientific expertise on how pharmaceutical products may influence sports performance and athlete health to healthcare professionals.
- **Health Outcomes Researcher (Sports Studies) (Pharma):** Conducting research to assess the real-world effectiveness of pharmaceutical products on sports performance and athlete health.

- Pharmaceutical Sports Studies Consultant: Offering expert advice on sports studies considerations in the context of pharmaceutical treatments and products.
- Sports Performance Program Manager (Pharma): Developing sports performance programs that complement pharmaceutical treatments.
- Pharmaceutical Sports Science Specialist: Applying sports studies principles to pharmaceutical product development and evaluation.
- Sports Performance Data Analyst (Pharma): Analyzing data from clinical trials and research studies involving pharmaceutical interventions and sports performance outcomes.
- Pharmaceutical Lifestyle Medicine Coordinator: Integrating sports studies and lifestyle interventions into pharmaceutical treatment plans.
- Sports Studies Compliance Specialist (Pharma): Ensuring compliance with sports studies standards in pharmaceutical research and development.
- Pharmaceutical Health and Wellness Educator (Sports Studies): Educating healthcare professionals and patients on sports studies considerations related to pharmaceutical treatments.
- Sports Performance Coordinator (Pharma): Managing sports performance programs in conjunction with pharmaceutical therapies.
- Pharmaceutical Lifestyle Coach (Sports Studies): Providing coaching and support to athletes and individuals on integrating sports studies practices alongside pharmaceutical treatments.
- Sports Studies Clinical Specialist (Pharma): Offering specialized expertise on sports studies matters in clinical settings that involve pharmaceutical products.
- Pharmaceutical Performance Enhancement Specialist (Sports Studies): Collaborating with pharmaceutical researchers to assess the impact of products on sports performance.

RECREATION SCIENCES

Recreation and Park Management

- Pharmaceutical Patient Engagement Coordinator (Recreation and Park Management): Developing and implementing recreational and wellness programs that complement pharmaceutical treatments for patients.
- Recreation and Park Management Research Specialist (Pharma): Conducting research on the effects of recreational activities and park utilization on patient well-being and health outcomes.
- Pharmaceutical Medical Science Liaison (Recreation and Park Management): Providing scientific expertise on how recreational activities and park utilization may impact patient health to healthcare professionals.
- Health Outcomes Researcher (Recreation and Park Management) (Pharma): Conducting research to assess the real-world effectiveness of pharmaceutical products on patient well-being in conjunction with recreational activities.
- Pharmaceutical Recreation and Park Management Consultant: Offering expert advice on recreation and park management considerations in the context of pharmaceutical treatments and patient support.
- Wellness Program Manager (Pharma): Developing and managing wellness programs in partnership with pharmaceutical therapies.
- Pharmaceutical Health and Wellness Educator (Recreation and Park Management): Educating healthcare professionals and patients on the benefits of recreation and park management in conjunction with pharmaceutical treatments.
- Recreation Program Coordinator (Pharma): Managing recreation programs that align with pharmaceutical therapies and promote patient well-being.
- Pharmaceutical Lifestyle Coach (Recreation and Park Management): Providing coaching and support to patients on integrating recreational activities and park visits alongside pharmaceutical treatments.

- Recreation and Park Management Compliance Specialist (Pharma): Ensuring compliance with recreation and park management standards in pharmaceutical research and development.
- Pharmaceutical Patient Support Specialist (Recreation and Park Management): Assisting patients in accessing and participating in recreation and park management programs that complement pharmaceutical treatments.
- Recreation and Park Utilization Data Analyst (Pharma): Analyzing data from patient participation in recreational activities and park visits in relation to pharmaceutical outcomes.
- Pharmaceutical Community Wellness Coordinator (Recreation and Park Management): Collaborating with community organizations and parks to develop wellness initiatives in conjunction with pharmaceutical therapies.
- Recreation and Park Management Clinical Specialist (Pharma): Offering specialized expertise on recreation and park management matters in clinical settings that involve pharmaceutical products.
- Pharmaceutical Patient Engagement Program Manager (Recreation and Park Management): Overseeing patient engagement programs that incorporate recreation and park management activities alongside pharmaceutical treatments.

Recreation Therapy

- Pharmaceutical Patient Support Coordinator (Recreation Therapy): Developing and implementing recreational therapy programs that complement pharmaceutical treatments for patients.
- Recreation Therapy Research Specialist (Pharma): Conducting research on the effects of recreational therapy on patient well-being and health outcomes in conjunction with pharmaceutical interventions.
- Pharmaceutical Medical Science Liaison (Recreation Therapy): Providing scientific expertise on how recreational therapy may impact patient health to healthcare professionals.
- Health Outcomes Researcher (Recreation Therapy) (Pharma): Conducting research to assess the real-world effectiveness of pharmaceutical products on patient well-being in partnership with recreational therapy.
- Pharmaceutical Recreation Therapy Consultant: Offering expert advice on recreation therapy considerations in the context of pharmaceutical treatments and patient support.
- Wellness Program Manager (Pharma): Developing and managing wellness programs that integrate recreational therapy with pharmaceutical therapies.
- Pharmaceutical Health and Wellness Educator (Recreation Therapy): Educating healthcare professionals and patients on the benefits of recreational therapy alongside pharmaceutical treatments.
- Recreation Therapy Program Coordinator (Pharma): Managing recreation therapy programs that align with pharmaceutical therapies and promote patient well-being.
- Pharmaceutical Lifestyle Coach (Recreation Therapy): Providing coaching and support to patients on integrating recreational therapy activities alongside pharmaceutical treatments.
- Recreation Therapy Compliance Specialist (Pharma): Ensuring compliance with recreation therapy standards in pharmaceutical research and development.
- Pharmaceutical Patient Support Specialist (Recreation Therapy): Assisting patients in accessing and participating in recreational therapy programs that complement pharmaceutical treatments.
- Recreation Therapy Data Analyst (Pharma): Analyzing data from patient participation in recreational therapy activities in relation to pharmaceutical outcomes.
- Pharmaceutical Community Wellness Coordinator (Recreation Therapy): Collaborating with community organizations and facilities to develop wellness initiatives that include recreational therapy and pharmaceutical interventions.
- Recreation Therapy Clinical Specialist (Pharma): Offering specialized expertise on recreation therapy matters in clinical settings that involve pharmaceutical products.

- Pharmaceutical Patient Engagement Program Manager (Recreation Therapy): Overseeing patient engagement programs that incorporate recreational therapy activities alongside pharmaceutical treatments.

Social Work

- Pharmaceutical Patient Support Coordinator (Social Work): Providing social and emotional support to patients using pharmaceutical products and treatments.
- Social Work Research Specialist (Pharma): Conducting research on the impact of social factors on patient well-being and health outcomes in conjunction with pharmaceutical interventions.
- Pharmaceutical Medical Science Liaison (Social Work): Providing expertise on how social determinants of health may influence patient health and outcomes to healthcare professionals.
- Patient Advocacy and Engagement Specialist (Pharma): Collaborating with patient advocacy groups and social work organizations to support patients in their pharmaceutical journey.
- Pharmaceutical Health Equity Coordinator (Social Work): Addressing health disparities and promoting health equity through pharmaceutical initiatives.
- Social Work Program Manager (Pharma): Developing and managing social work programs that complement pharmaceutical therapies.
- Pharmaceutical Health and Wellness Educator (Social Work): Educating healthcare professionals and patients on the social aspects of health and its intersection with pharmaceutical treatments.
- Patient Support and Assistance Coordinator (Pharma): Assisting patients in accessing pharmaceutical products and support services that address social needs.
- Social Work Compliance Specialist (Pharma): Ensuring compliance with social work standards in pharmaceutical research and development.
- Pharmaceutical Community Engagement Coordinator (Social Work): Engaging with communities and social service agencies to address patient needs and support pharmaceutical initiatives.
- Social Work Data Analyst (Pharma): Analyzing data related to patient social factors and outcomes in conjunction with pharmaceutical interventions.
- Pharmaceutical Mental Health Advocate: Advocating for patients' mental health needs and the integration of mental health services with pharmaceutical treatments.
- Social Work Clinical Specialist (Pharma): Offering specialized expertise on social work matters in clinical settings that involve pharmaceutical products.
- Pharmaceutical Patient Assistance Manager (Social Work): Managing patient assistance programs and services to support access to pharmaceutical treatments.
- Social Work Patient Engagement Program Manager (Pharma): Overseeing patient engagement programs that incorporate social work services alongside pharmaceutical treatments.
